**AUSTRALIAN & NEW ZEALAND PROVIDER
OF THE EASYLUBE AUTOMATED
LUBRICATION SYSTEM**

Australian privately owned and
operated for over 10 years

We acknowledge the traditional owners and custodians of country throughout Australia and acknowledge their continuing connection to land, waters and community. We pay our respects to the people, the cultures and the elders past, present and emerging.

A Common Problem

When a grease-lubricated bearing is not greased properly (under or over), the machinery part will stop working. Avoidable production halts can cost \$millions each day in downtime and lost production.

Many bearings can be manually lubricated but:

1. The organisation cannot always find adequately skilled and reliable maintenance technicians to adhere to Minimum Quantity Lubrication (MQL) processes and procedures
2. There's no guarantee re-lubrication intervals for all bearings will be properly maintained due to harsh environmental and weather conditions

The Solution

Easylube's Single Point Grease Lubricator

AUTOMATED LUBRICATION

Widely recognised and proven:

- ✔ MLQ re-lubrication intervals and volumes maintained
- ✔ Significantly reduces risk of bearing failure (uncontrolled downtime)
- ✔ Greatly reduces cost (replaces labor-intensive manual greasing)
- ✔ Removes uncertainty and human error, especially in isolated, scattered, dangerous and negligible areas
- ✔ Reduces waste (environmental benefit)

How It Works

DRIVE UNIT

One-time purchase

+

GREASE CUP

Replaced every 2 to 3 months

Automatic Lubrication
RFID Tags and Readers
simplify inspection
routine procedure

A row of three Easylube 250 RFID lubrication units is shown in a close-up shot. The units are black with yellow accents and are mounted on a yellow metal frame. The text 'Easylube' and '250 RFID' is visible on the units. The background is slightly blurred, showing more of the machine's structure.

→ No surprises

A job that's always being done exactly as instructed, yet one less job you have to do

» Benefits

Behind the scenes, Easylube is constantly keeping your plant and equipment working

- ✔ **Operational reliability.** Keep your machinery operating to schedule.
- ✔ **Reduced workforce impact.** Reduce manual re-greasing.
- ✔ **Reduce safety risk.** Reliable re-greasing in dangerous and hard-to-reach environments.

→ Company Insights

THE FOUNDERS

Founded in 2010 by two diesel mechanics who understand the importance of plant lubrication.

UNIQUE VALUE PROPOSITION

Catmacs is the exclusive distributor of Easylube in Australia and NZ.

We have stock available from our facility.

LOCAL SERVICE PROPOSITION

Catmacs provides local installation, servicing, training and customer support to clients all over Western Australia.

» Indigenous and Local Community Focused

Powerful Form of Corporate Social Responsibility (CSR)

Catmacs facilitates a range of benefits for Indigenous Communities.

- ✔ Training of entry level site-based personnel to install, inspect and service Easylube units, creating viable job opportunities (including a sense of vision, passion and belonging) for indigenous and local community people.
- ✔ Facilitation of opportunities for Indigenous Service Providers within the Catmacs delivery network.

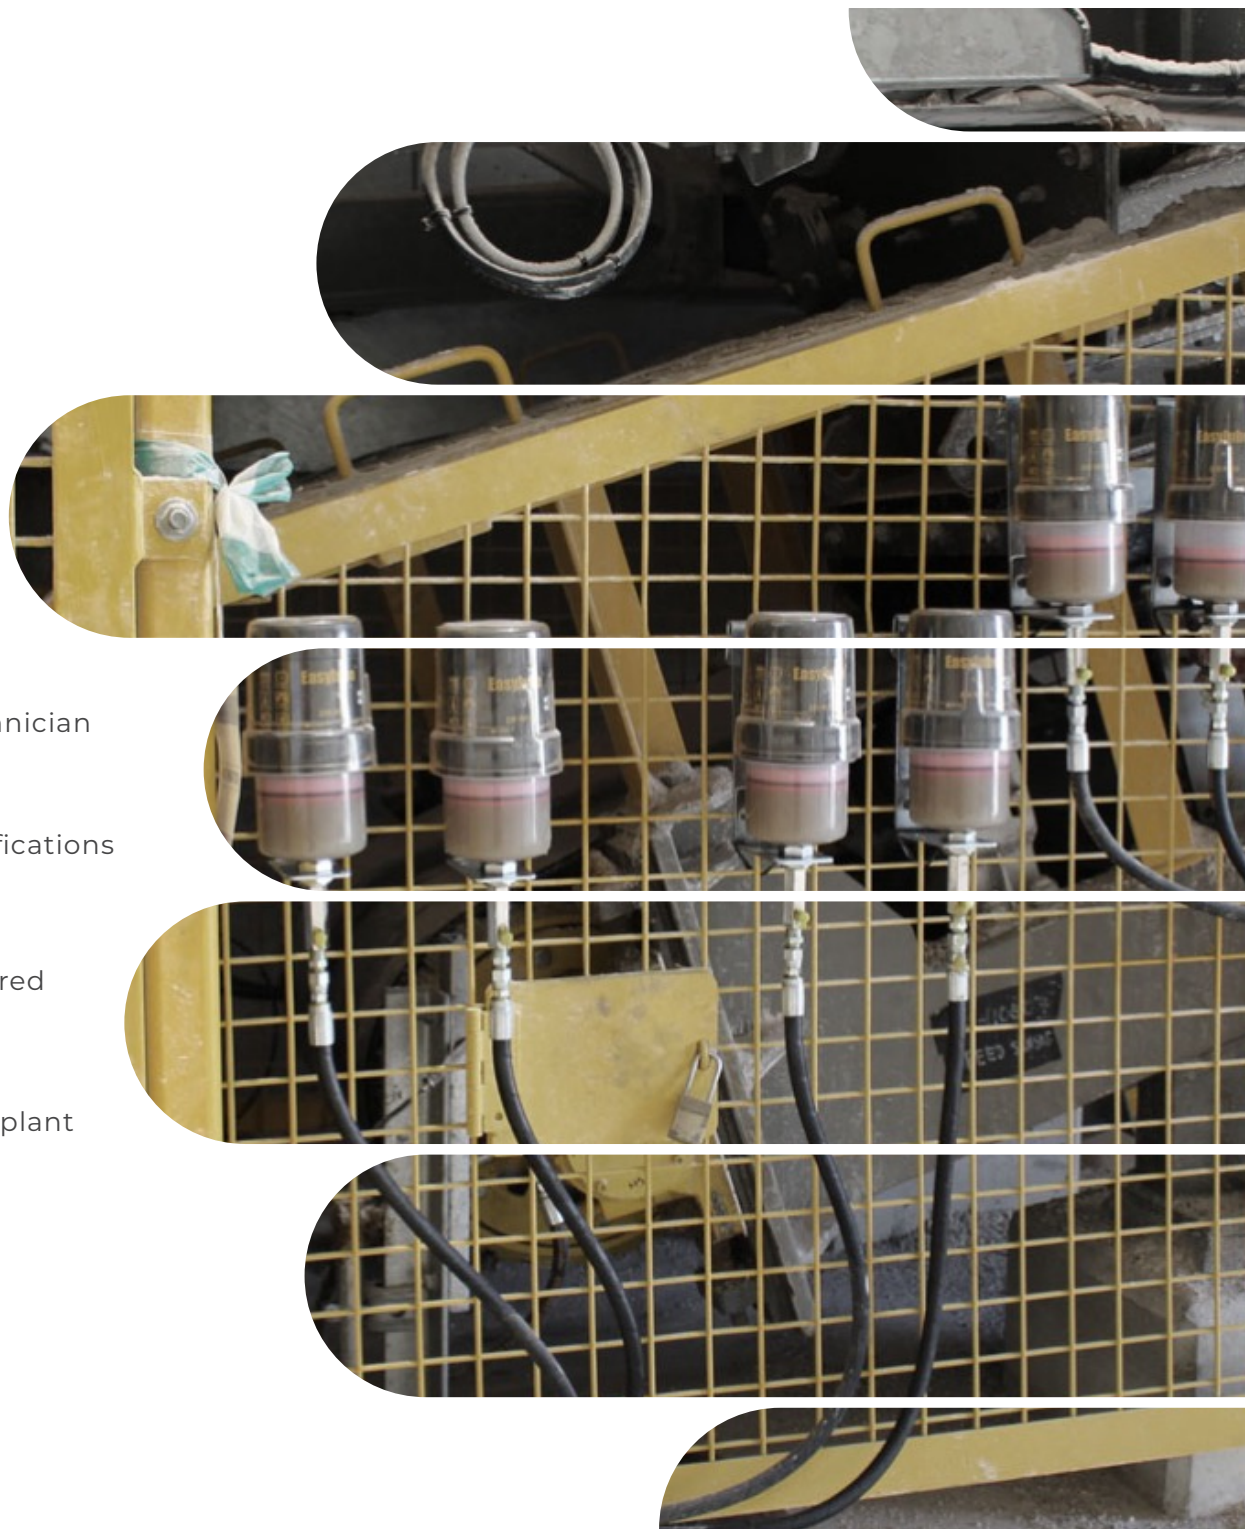

Social Procurement

→ Installation Service

All Easylube units are installed by a qualified Catmacs technician

- ✔ Confirmation of exact grease requirements and specifications with site Engineers
- ✔ Installation and commissioning of all units at all required points at the site
- ✔ Report to confirm completion of the installation with plant IDs for ongoing monitoring

» Training

Training workers to confidently and reliably maintain critical assets using Easylube

Training enables participants to:

- ✓ Install Easylube units to the required specification
- ✓ Check and report on the status of Easylube units
- ✓ Troubleshoot potential regreasing issues
- ✓ Manage cup refills and replacement of units or parts
- ✓ Optimise where the units are used to support effective plant or asset maintenance

Training is available on site, at a preferred company-arranged location, or at the Catmacs training facility south of Perth.

» Local Servicing

Our trained technicians can service your Easylube units

Our monthly or quarterly on site servicing includes

- ✓ Monitoring of unit status
- ✓ Troubleshooting
- ✓ Status reporting
- ✓ Managing cup refills to an optimized schedule
- ✓ Replacement of units or parts
- ✓ Optimise how the units are used to support effective plant or asset maintenance

Telephone support is available with all service contracts, as well as on site coaching of employees during each service visit

Assurance of your asset lubrication

With workforce changes and shortages, gain peace of mind that the status of asset lubrication is always known.

→ Why Catmacs

- ✓ Australian owned and operated
- ✓ Simpler, extremely reliable and most affordable
- ✓ Product replacement guarantee
- ✓ Keep it personal with local and on-site support

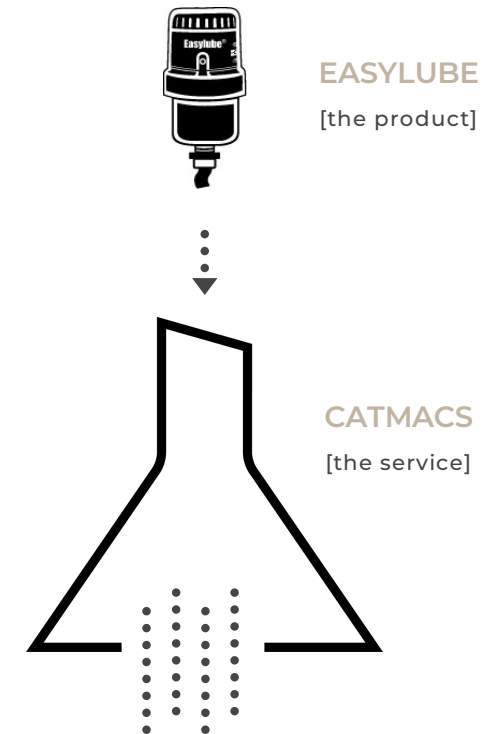

We go further to provide the options, which work for you

- ✓ Indigenous & local community development
- ✓ Proven ethical customer and product support
- ✓ Training (on/off site)
- ✓ Free trials

➔ The Value

● LABOUR SAVINGS

- Less staffing required
- Significantly safer than manual regreasing
- Option for sensor integration (vibration, temperature, moisture)

● COST SAVINGS

- Significantly more affordable than manual regreasing
- Competitive with alternative products
- CapEx & OpEx flexibility

● ESG BENEFITS

- Indigenous employment for unit servicing and grease refills
- \$ to community benefits (investment in education, recreation and local industry enablement)

● ASSURANCE

- Reliable asset regreasing
- Checking and reporting for every grease-point
- Peace of mind for operational continuity
